

International Society for Nutraceuticals and Functional Foods

ISNFF Newsletter June 2015

Volume 8, Issue 1

The International Society for Nutraceuticals and Functional Foods (ISNFF) had one of its most successful meetings last year in Istanbul, Turkey, with participation of some 700 attendees along with a dozen or so exhibitors from around the globe. This year's Annual Meeting and Exhibition of the ISNFF will be held at the Worldhotel Grand Juna, a five-star hotel, in Wuxi, China, from September 20 to 23, 2015. This meeting is promising to be yet another exciting event that will bring the scientists, industry leaders, entrepreneurs, and government agencies together to exchange ideas and to share information about the latest findings and products, potential for commercialization of concepts and laboratory, as well as pilot scale findings to the

market. I would be remiss if I didn't mention that Wuxi is the home of Jiangnan University, which has the largest food science program in the world with some 2,000 undergraduate and graduate students and some 150 faculty. Therefore, this and the country, which is the cradle of traditional Chinese medicine for thousands of years, will provide ample opportunities for those interested in the field and in commercialization of their functional food products to this most populous country to take advantage of this opportunity by attending the meeting and exhibition.

Because the main website of the society <isnff.org> is under revamping and reconstruction, please check <isnff2015.org> for all information about the 2015 conference and auxiliary news in this regard.

Finally, the Journal of Functional Foods (JFF), the official journal of the ISNFF, had a very successful 2014 with 1,844 submissions, up markedly from 1,226 in 2013. To date this year, the number of submissions has so far exceeded 1,200! The JFF is placed as the second highest ranking research journal in the food science and allied

disciplines, and the fifth in overall ranking. Regardless of its impact factor, the JFF continues to strive for communicating the best and most relevant findings in the functional foods and nutraceuticals field. We are indebted to all authors, editorial board members, and associate editors for their support.
